

## Cyltech ACT

Crosshead Engine Cylinder Lubricant

### Description

Castrol Cyltech ACT (Ash Control Technology) is a premium marine diesel engine cylinder lubricant specifically developed to provide protection when using low sulphur fuels and LNG.

### Application

Cyltech ACT is suitable for the cylinder lubrication of all crosshead engines burning low sulphur fuels that comply with current IMO Emission Control Area (ECA) legislation where a maximum sulphur content of 0.1% (1,000 ppm) is mandated. It is also suitable for other low sulphur and zero sulphur fuels such as natural gas.

### Advantages

If high BN lubricants (with high ash content) are used for extended periods when burning low sulphur fuels, there is a tendency for ash deposits to build up on the piston and in the exhaust system and turbochargers. Use of Cyltech ACT, as a low ash lubricant, effectively mitigates this potential problem.

- Reduced potential for ash deposition on engine components
- Reduced risk of cylinder bore polishing as a consequence of ash deposits rubbing on the liner

## Typical Characteristics

Name	Method	Units	Cyltech ACT
Density @ 15C, Relative	ASTM D4052	g/ml	0.9
Appearance	Visual	-	Clear & Bright
Viscosity, Kinematic 100C	ASTM D445	mm <sup>2</sup> /s	19.5
Total Base Number, TBN	ASTM D2896	mg KOH/g	16
Flash Point, PMCC	ASTM D93	°C	206

## Storage

All packages should be stored under cover. Where outside storage is unavoidable, drums should be laid horizontally to avoid the possible ingress of water and the obliteration of drum markings. Products should not be stored above 60°C, exposed to hot sun or freezing conditions.
