

# SAFETY DATA SHEET

Castrol High Temperature Grease

## Section 1. Identification

**GHS product identifier** Castrol High Temperature Grease  
**Product code** 467200-SG01  
**SDS #** 467200  
**Relevant identified uses of the substance or mixture and uses advised against**  
**Use of the substance/mixture** Grease for industrial applications.  
For specific application advice see appropriate Technical Data Sheet or consult our company representative.  
**Supplier** BP Taiwan Marketing Limited  
Level 57-1, TAIPEI 101 Tower, No. 7, Section 5, Xinyi Road, Taipei, 11049, Taiwan, R.O.C.  
**EMERGENCY TELEPHONE NUMBER** Tel: +886 70 1011 9900  
Carechem: +886 2 8793 3212 (24/7)

## Section 2. Hazards identification

**Classification of the substance or mixture** Not classified.

### GHS label elements

**Signal word** No signal word.  
**Hazard statements** No known significant effects or critical hazards.  
**Precautionary statements**  
**Prevention** Not applicable.  
**Response** Not applicable.  
**Storage** Not applicable.  
**Disposal** Not applicable.

**Other hazards which do not result in classification** Defatting to the skin.  
Note: High Pressure Applications  
Injections through the skin resulting from contact with the product at high pressure constitute a major medical emergency.  
See 'Notes to physician' under First-Aid Measures, Section 4 of this Safety Data Sheet.

## Section 3. Composition/information on ingredients

**Substance/mixture** Mixture  
Highly refined base oil (IP 346 DMSO extract < 3%). Thickening agent. Proprietary performance additives.

Chinese name	% (w/w)	CAS number	Type
Distillates (petroleum), solvent-dewaxed heavy paraffinic	≥25 - ≤50	CAS: 64742-65-0	[2]
Residual oils (petroleum), solvent refined	≥25 - ≤50	CAS: 64742-01-4	[2]
Distillates (petroleum), hydrotreated heavy naphthenic	≤10	CAS: 64742-52-5	[2]
dilithium sebacate	≤3	CAS: 19370-86-6	[1]
4,4'-methylene bis(dibutylidithiocarbamate)	≤3	CAS: 10254-57-6	[1]
化學品名稱	% (w/w)	化學文摘社登記號碼(CAS No.)	類型

**Product name** Castrol High Temperature Grease  
**Version** 5.01 **Date of issue** 29/09/2025.

**Product code** 467200-SG01 **Page:** 1/10  
**Format** Taiwan **Language** ENGLISH  
Taiwan (ENGLISH)

### Section 3. Composition/information on ingredients

溶劑脫蠟重質蠟族石油餾分	$\geq 25 - \leq 50$	化學文摘社: 64742-65-0	[2]
溶劑精製石油殘留油	$\geq 25 - \leq 50$	化學文摘社: 64742-01-4	[2]
經過氫化處理的重質環烷烴石油餾分	$\leq 10$	化學文摘社: 64742-52-5	[2]
dilithium sebacate	$\leq 3$	化學文摘社: 19370-86-6	[1]
4,4'-methylene bis(dibutylidithiocarbamate)	$\leq 3$	化學文摘社: 10254-57-6	[1]

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

#### Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### Description of necessary first aid measures

##### Inhalation

If inhaled, remove to fresh air. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. Get medical attention if symptoms occur.

##### Ingestion

Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

##### Skin contact

Wash skin thoroughly with soap and water or use recognised skin cleanser. Remove contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention if symptoms occur. If skin irritation or rash occurs: Get medical advice/attention.

##### Eye contact

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Check for and remove any contact lenses. Get medical attention.

##### Protection of first-aiders

No action shall be taken involving any personal risk or without suitable training.

#### Most important symptoms/effects, acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

#### Indication of immediate medical attention and special treatment needed, if necessary

##### Specific treatments

No specific treatment.

##### Notes to physician

Treatment should in general be symptomatic and directed to relieving any effects. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Note: High Pressure Applications

Injections through the skin resulting from contact with the product at high pressure constitute a major medical emergency. Injuries may not appear serious at first but within a few hours tissue becomes swollen, discoloured and extremely painful with extensive subcutaneous necrosis.

Surgical exploration should be undertaken without delay. Thorough and extensive debridement of the wound and underlying tissue is necessary to minimise tissue loss and prevent or limit permanent damage. Note that high pressure may force the product considerable distances along tissue planes.

### Section 5. Firefighting measures

#### Extinguishing media

##### Suitable extinguishing media

In case of fire, use water fog, alcohol resistant foam, dry chemical or carbon dioxide extinguisher or spray.

##### Unsuitable extinguishing media

Do not use water jet.

#### Specific hazards arising from the chemical

No specific fire or explosion hazard.

## Section 5. Firefighting measures

### Hazardous thermal decomposition products

Combustion products may include the following:  
metal oxide/oxides  
carbon oxides (CO, CO<sub>2</sub>) (carbon monoxide, carbon dioxide)  
sulphur oxides (SO, SO<sub>2</sub>, etc.)  
nitrogen oxides (NO, NO<sub>2</sub> etc.)

### Special protective actions for fire-fighters

No action shall be taken involving any personal risk or without suitable training. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire.

### Special protective equipment for fire-fighters

Fire-fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear.

## Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment. Floors may be slippery; use care to avoid falling.

### Environmental precautions

Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

### Methods and material for containment and cleaning up

#### Small spill

Move containers from spill area. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.

#### Large spill

Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Avoid creating dusty conditions and prevent wind dispersal. If emergency personnel are unavailable, contain spilt material. Suction or scoop the spill into appropriate disposal or recycling vessels, then cover spill area with oil absorbent. Dispose of via a licensed waste disposal contractor.

## Section 7. Handling and storage

### Precautions for safe handling

#### Protective measures

Put on appropriate personal protective equipment (see Section 8).

#### Advice on general occupational hygiene

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Wash thoroughly after handling. Remove contaminated clothing and protective equipment before entering eating areas. Contaminated work clothing should not be allowed out of the workplace. See also Section 8 for additional information on hygiene measures.

### Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep away from heat and direct sunlight. Keep container tightly closed and sealed until ready for use. Store and use only in equipment/containers designed for use with this product. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

### Not suitable

Prolonged exposure to elevated temperature

## Section 8. Exposure controls/personal protection

### Control parameters

#### Occupational exposure limits

Ingredient name	Exposure limits
Distillates (petroleum), solvent-dewaxed heavy paraffinic	<b>TW Ministry of Labor, labor permissible workplace exposure standards, allowable concentration (Taiwan) [Oil mist]</b> STEL 15 minutes: 10 mg/m <sup>3</sup> . Form: Mist. Issued/Revised: 1/2005. TWA 8 hours: 5 mg/m <sup>3</sup> . Form: Mist. Issued/Revised: 1/2005.
Residual oils (petroleum), solvent refined	<b>TW Ministry of Labor, labor permissible workplace exposure standards, allowable</b>

## Section 8. Exposure controls/personal protection

Distillates (petroleum), hydrotreated heavy naphthenic

### concentration (Taiwan) [Oil mist]

STEL 15 minutes: 10 mg/m<sup>3</sup>. Form: Mist.

Issued/Revised: 1/2005.

TWA 8 hours: 5 mg/m<sup>3</sup>. Form: Mist. Issued/Revised: 1/2005.

### TW Minstry of Labor, labor permissible workplace exposure standards, allowable concentration (Taiwan) [Oil mist]

STEL 15 minutes: 10 mg/m<sup>3</sup>. Form: Mist.

Issued/Revised: 1/2005.

TWA 8 hours: 5 mg/m<sup>3</sup>. Form: Mist. Issued/Revised: 1/2005.

### Biological exposure indices

No exposure indices known.

### Recommended monitoring procedures

Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

### Appropriate engineering controls

All activities involving chemicals should be assessed for their risks to health, to ensure exposures are adequately controlled. Personal protective equipment should only be considered after other forms of control measures (e.g. engineering controls) have been suitably evaluated. Personal protective equipment should conform to appropriate standards, be suitable for use, be kept in good condition and properly maintained.

Your supplier of personal protective equipment should be consulted for advice on selection and appropriate standards. For further information contact your national organisation for standards.

Provide exhaust ventilation or other engineering controls to keep the relevant airborne concentrations below their respective occupational exposure limits.

The final choice of protective equipment will depend upon a risk assessment. It is important to ensure that all items of personal protective equipment are compatible.

### Environmental exposure controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### Individual protection measures

#### Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.

Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

#### Eye protection

Safety glasses with side shields.

#### Skin protection

##### Hand protection

Wear protective gloves if prolonged or repeated contact is likely. Wear chemical resistant gloves. Recommended: Nitrile gloves. The correct choice of protective gloves depends upon the chemicals being handled, the conditions of work and use, and the condition of the gloves (even the best chemically resistant glove will break down after repeated chemical exposures). Most gloves provide only a short time of protection before they must be discarded and replaced. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Gloves should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.

##### Body protection

Use of protective clothing is good industrial practice.

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Cotton or polyester/cotton overalls will only provide protection against light superficial contamination that will not soak through to the skin. Overalls should be laundered on a regular basis. When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required.

##### Other skin protection

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

## Section 8. Exposure controls/personal protection

### Respiratory protection

In case of insufficient ventilation, wear suitable respiratory equipment.  
The correct choice of respiratory protection depends upon the chemicals being handled, the conditions of work and use, and the condition of the respiratory equipment. Safety procedures should be developed for each intended application. Respiratory protection equipment should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.

## Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

### Appearance

#### Physical state

Grease

#### Colour

Amber.

#### Odour

Characteristic.

#### Odour threshold

Not available.

#### pH

Not applicable.

#### Melting point/freezing point

Not available.

#### Boiling point or initial boiling point and boiling range

Not available.

#### Drop Point

Not available.

#### Flash point

Closed cup: >200°C (>392°F) [Pensky-Martens ASTM D 93]

#### Evaporation rate

Not available.

#### Flammability

Not available.

#### Lower and upper explosion limit/flammability limit

Not applicable.

#### Vapour pressure

Not available.

Ingredient name	Vapour Pressure at 20°C			Vapour pressure at 50°C		
	mm Hg	kPa	Method	mm Hg	kPa	Method

#### Relative vapour density

Not applicable.

#### Relative density

Not available.

#### Density

#### Solubility(ies)

Media	Result
water	Not soluble

#### Partition coefficient: n-octanol/water

Not applicable.

#### Auto-ignition temperature

>300°C (>572°F)

#### Decomposition temperature

Not available.

#### Viscosity

Not available.

#### Particle characteristics

#### Median particle size

Not available.

## Section 10. Stability and reactivity

### Reactivity

No specific test data available for this product. Refer to Conditions to avoid and Incompatible materials for additional information.

### Chemical stability

The product is stable.

### Possibility of hazardous reactions

Under normal conditions of storage and use, hazardous reactions will not occur.  
Under normal conditions of storage and use, hazardous polymerisation will not occur.

### Conditions to avoid

Avoid all possible sources of ignition (spark or flame).

### Incompatible materials

Reactive or incompatible with the following materials: oxidising materials.

### Hazardous decomposition products

Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## Section 11. Toxicological information

### Information on toxicological effects

#### Acute toxicity

##### Product/ingredient name

Distillates (petroleum), solvent-dewaxed  
heavy paraffinic

4,4'-methylene bis(dibutylidithiocarbamate)

##### Result

###### Rat - Oral - LD50

>5000 mg/kg  
OECD 401

###### Rat - Dermal - LD50

>2000 mg/kg  
OECD 402

###### Rat - Inhalation - LC50 Dusts and mists

>5.53 mg/l [4 hours]  
OECD 403

###### Rat - Oral - LD50

>5000 mg/kg  
OECD 401

###### Rabbit - Dermal - LD50

>2000 mg/kg  
OECD 402

#### Skin corrosion/irritation

##### Product/ingredient name

Distillates (petroleum), solvent-dewaxed  
heavy paraffinic  
4,4'-methylene bis(dibutylidithiocarbamate)

##### Result

**Rabbit - Skin - Non-irritant to skin.**

###### Rabbit - Skin - Not irritant

OECD 404

#### Serious eye damage/eye irritation

##### Product/ingredient name

Distillates (petroleum), solvent-dewaxed  
heavy paraffinic  
4,4'-methylene bis(dibutylidithiocarbamate)

##### Result

**Rabbit - Eyes - Non-irritating to the eyes.**

OECD 405

###### Rabbit - Eyes - Not irritant

OECD 405

#### Respiratory corrosion/irritation

Not available.

#### Respiratory or skin sensitization

##### Product/ingredient name

Distillates (petroleum), solvent-dewaxed  
heavy paraffinic  
4,4'-methylene bis(dibutylidithiocarbamate)

##### Result

###### Guinea pig - skin

OECD 406  
Result: Not sensitising

###### Mouse - skin

OECD 429  
Result: Not sensitising

#### Germ cell mutagenicity

##### Product/ingredient name

Distillates (petroleum), solvent-dewaxed  
heavy paraffinic

4,4'-methylene bis(dibutylidithiocarbamate)

##### Result

###### In vitro - Bacteria

OECD [Bacterial Reverse Mutation Test]  
Result: Negative

###### In vitro - Mammal - species unspecified

OECD [In vitro Mammalian Chromosomal Aberration Test]  
Result: Negative

###### In vitro - Bacteria

## Section 11. Toxicological information

Result: Negative  
**In vitro - Mammalian-Animal**  
OECD 473  
Result: Negative  
**In vitro - Mammalian-Animal**  
OECD 476  
Result: Negative

### Carcinogenicity

#### **Product/ingredient name**

Distillates (petroleum), solvent-dewaxed  
heavy paraffinic

#### **Result**

**Mouse - Dermal - Unspecified**  
OECD 451  
Result: Negative

#### **Information on likely routes of exposure**

Routes of entry anticipated: Oral, Dermal, Inhalation, Eyes.

#### **Potential acute health effects**

##### **Eye contact**

No known significant effects or critical hazards.

##### **Inhalation**

Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.

##### **Skin contact**

Defatting to the skin. May cause skin dryness and irritation.

##### **Ingestion**

No known significant effects or critical hazards.

#### **Symptoms related to the physical, chemical and toxicological characteristics**

##### **Eye contact**

No specific data.

##### **Inhalation**

No specific data.

##### **Skin contact**

Adverse symptoms may include the following:  
irritation  
dryness  
cracking

##### **Ingestion**

No specific data.

#### **Delayed and immediate effects as well as chronic effects from short and long-term exposure**

##### **Eye contact**

Potential risk of transient stinging or redness if accidental eye contact occurs.

##### **Skin contact**

Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.

##### **Ingestion**

Ingestion of large quantities may cause nausea and diarrhoea.

#### **Potential chronic health effects**

##### **General**

No known significant effects or critical hazards.

##### **Carcinogenicity**

No known significant effects or critical hazards.

##### **Mutagenicity**

No known significant effects or critical hazards.

##### **Developmental effects**

No known significant effects or critical hazards.

##### **Fertility effects**

No known significant effects or critical hazards.

#### **Numerical measures of toxicity**

##### **Acute toxicity estimates**

Route	ATE value
Oral	21760.87 mg/kg

## Section 12. Ecological information

#### **Environmental effects**

No known significant effects or critical hazards.

#### **Product/ingredient name**

#### **Result**

## Section 12. Ecological information

Distillates (petroleum), solvent-dewaxed  
heavy paraffinic

### Acute - EL50

OECD 201

Algae

>100 mg/l [72 hours]

### Acute - EL50

### Persistence and degradability

Expected to be biodegradable.

#### Product/ingredient name

Distillates (petroleum), solvent-dewaxed

heavy paraffinic

4,4'-methylene bis(dibutyldithiocarbamate)

#### Result

OECD 301F

31% [28 days] - Not readily

OECD 301B

21% [28 days] - Not readily

### Bioaccumulative potential

This product is not expected to bioaccumulate through food chains in the environment.

Product/ingredient name	LogP <sub>ow</sub>	BCF	Potential
4,4'-methylene bis (dibutyldithiocarbamate)	8.42	10.86	Low

### Mobility in soil

#### Soil/water partition coefficient

Not available.

#### Mobility

Spillages are unlikely to penetrate the soil.

## Section 12. Ecological information

**Other ecological information** This product is unlikely to disperse in water.

## Section 13. Disposal considerations

**Disposal methods** The generation of waste should be avoided or minimised wherever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

## Section 14. Transport information

	IMDG	IATA
UN number	Not regulated.	Not regulated.
UN proper shipping name	-	-
Transport hazard class(es)	-	-
Packing group	-	-
Environmental hazards	No.	No.

### Notice to reader

All reasonably practicable steps have been taken to ensure this data sheet and the health, safety and environmental information contained in it is accurate as of the date specified below. No warranty or representation, express or implied is made as to the accuracy or completeness of the data and information in this data sheet.

The data and advice given apply when the product is sold for the stated application or applications. You should not use the product other than for the stated application or applications without seeking advice from BP Group.

It is the user's obligation to evaluate and use this product safely and to comply with all applicable laws and regulations. The BP Group shall not be responsible for any damage or injury resulting from use, other than the stated product use of the material, from any failure to adhere to recommendations, or from any hazards inherent in the nature of the material. Purchasers of the product for supply to a third party for use at work, have a duty to take all necessary steps to ensure that any person handling or using the product is provided with the information in this sheet. Employers have a duty to tell employees and others who may be affected of any hazards described in this sheet and of any precautions that should be taken. You can contact the BP Group to ensure that this document is the most current available. Alteration of this document is strictly prohibited.
